

## Diamond Class daily learning tasks 20.07.20

The last two days of the term are upon us. Well done to you all for all the learning you have been doing at home this term. I am very proud of you all! These are the last two days of lesson plans – a lovely DT project to end with. There are also some English plans. The next book we will be looking at is ‘How does a lighthouse work?’ by Roman Belyaev. It is a non-fiction book which explores lighthouses across the world and how they have changed over time. There is enough work for 7 days but school holidays do start on Wednesday so please don’t think you have to complete all the lessons – though you can if you want to! Please remember that you can still complete Doodle Maths, English, Times tables and Spellings daily in the holidays if you wish to.

**Monday and  
Tuesday**

### **Design Technology**

Open the attached powerpoint, ‘DT Beach chair ppt’. Over the two days, read all the slides from lesson 2 to lesson 4 and answer all the questions either on the attached worksheets or in your book. I would love to see your beach chair designs. I will then put them on the website so we can see each other’s designs. I’m sure they will be very inventive and amazing!

Should you wish to, slide 5 has some extension activities.
