

Wednesday 21st October

Adopt a brown bear

Brown bears live in Canada (or Alaska) and they eat fish. Brown bears are hunted for their fur, teeth and claws and they suffer habitat loss. The brown bears are desperate for our help.

I am determined to get you to adopt a brown bear. Adopt a brown bear so it does not die! If you adopt a brown bear you receive a free adoption pack that contains a soft toy, a magazine and we will receive £3 a month. It is a nuisance how they treat the bears!

😊 I Love the line 'I am determined ...' It makes me understand how serious you are!
