

Wednesday 21st October

I wish for you to adopt a Giraffe because there are people who are trying to kill them and hunt for their meat. They have been seriously threatened and it's possible they could get extinct and put in boxes and the boxes like attached to some type of vehicle and hurt their necks and legs and getting petrified and shaking

Where they live

they live in the open woodlands, Savannahs, Easterns, South Africa, Southern Africa

Diet / Height

Leaves, twigs, grass, fruit and vegetables and wild plants even Bush leaves there are off the trees animals their height is 1600kg

How much money

there only £3 a month help by adopting animals ✓ they are very good smellers they can see predators in the sky and trees

You give some good reasons why we should adopt a Moonbe giraffe.
