ADOPT A TIGER TODAY

To the parents/carers, teachers and staff of ~~F~~ Fleggbury Primary School,

I am writing to you to persuade you to adopt a tiger from the Born Free Foundation.

Tigers are easily spotted because of their orange fur and black stripes and are well-known big cats. They have retractable claws and sharp teeth, good for hunting, as well as being the largest big cat on Earth!

However, over the last century, wild tiger numbers have plummeted from 100,000 to just 4,000!

These amazing animals are under threat and face the risk of extinction. 93% of tiger's habitats have been destroyed to make way for buildings or trees have been cut down. Other reasons these animals are endangered are conflict with farmers, poaching, and exploitation. We really need to help them.

From just £3 a month / a payment of your choice, you can help. With your money, we can help rehabilitate some of these tigers.

You also get:

- Adoption pack
- Free soft toy
- Adopt! magazine
- Regular photos of your tiger

With your contribution, you could help save one of these wonderful tiger's lives!

If you adopt one of these tigers, who are under threat, we can take good care of them and you will get photos of your tiger sent regularly in the post.

If you do not want these endangered animals to become extinct, you must adopt!

Kind ~~Res~~ regards, Rebecca.

☺ I'm glad you added the last paragraph to convince me to adopt the tiger.
