

		Working Scientifically		
	Asking Questions	Measuring and Recording	Concluding	Evaluating
Foundation	Explore the familiar world around them and raise their own questions	Use trial and error to solve their own problems when exploring the world around them	Develop their own narratives and explanations by connecting ideas or events	Talk about what they have discovered in the world around them and how they discovered it.
Years 1/2	Ask simple questions and recognise that they can be answered in different ways	Observe closely, using simple equipment Perform simple tests Gather and record data to help in answering questions	Identify and classify Use their observations and ideas to suggest answers to questions	Discuss their observations, measurements and predictions and think about how they can could be better or more accurate
Years 3/4	Ask relevant questions and use different types of scientific enquiries to answer them Set up simple practical enquiries, comparative and fair tests	Make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers	Identify differences, similarities or changes related to simple scientific ideas and processes Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions	Use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions

Years 5/6	Plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary	Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables Gather, record, classify and present data in a variety of ways to help in answering questions Take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line	Use straightforward scientific evidence to answer questions or to support their findings Identify scientific evidence that has been used to support or refute ideas or arguments Report and present findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations	Use test results to make predictions to set up further comparative and fair tests
	Worki	graphs ng Scientifically at Greater	Denth	
Foundation		ening, tasting, smelling and touc		
	Can give reasons for their ans Can discuss similarities and di	wers.	-	
Year 1	Can give reasons for their ans Can discuss similarities and di Can they explain what they ha		ocabulary.	

Year 2	Can suggest ways of finding out through listening, hearing, smelling, touching and tasting
	Can say whether things happened as they expected and if not why not.
	Can suggest more than one way of grouping animals and plants and explain their reasons
	Can use information from books and online information to find things out
	Can begin to independently consider controlling variables to create a fair test
Year 3	Can record and present what they have found using scientific language, drawings, labelled diagrams, bar charts and tables
	Can explain their findings in different ways.
	Can use their findings to draw a simple conclusion.
	Can suggest improvements and predictions for further tests
	Can suggest how to improve their work if they did it again
Year 4	Can plan and carry out an investigation by controlling variables fairly and accurately
	Can use test results to make further predictions and set up further comparative tests
	Can record more complex data and results using scientific diagrams, classification keys, tables, bar charts, line graphs and
	models
	Can report findings from investigations through written explanations and conclusions
	Can use a graph or diagram to answer scientific questions
	Can use a range of variables to investigate
Year 5	Can explore different ways to test an idea, choose the best way and give reasons
	Can vary one factor whilst keeping the others the same in an experiment
	Can use information to help make a prediction
	Can explain, in simple terms, a scientific idea and what evidence supports it
	Can decide which units of measurement they need to use
	Can explain why a measurement needs to be repeated
	Can find a pattern from their data and explain what it shows
	Can link what they have found out to other science
	Can they suggest how to improve their work and say why they think this
Year 6	Can choose the best way to answer a question and use information from different sources to plan an investigation
	Can make a prediction which links with other scientific knowledge
	Can plan which equipment they will need and use it effectively
	Can explain qualitative and quantitative data
	Can identify scientific evidence that has been used to support or to refute ideas or arguments and link their conclusions to
	it
	Can explain how they could improve their way of working

Can report and present findings from enquiries, including conclusions, causal relationships and explanations of and degree
of trust in results, in oral and written forms such as displays and other presentations

## Foundation

Show curiosity about the world around them through exploration and play	Develop idea of grouping, sequences and cause and effect	Choose resources and handle equipment and tools effectively to carry out activities
Engage in open ended problem solving activities	Explore similarities and differences in natural and man made objects and materials	Make links and notice patterns
Take risks to engage in new learning	Use senses to explore and observe the world	Take on the role of scientists, doctors,
activities	around them	engineers etc

## KS1

	Plants
Year 1 Deciduous, Evergreen trees, Leaves, Flowers (blossom), Petals, Fruit, Roots, Bulb, Seed, Trunk, Branches, Stem	Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees Identify and describe the basic structure of a variety of common flowering plants, including trees
<b>Year 2</b> Seeds, Bulbs, Water, Light, Temperature, Growth	Observe and describe how seeds and bulbs grow into mature plants Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy

	Animals including humans	
Year 1	Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals. Identify	
Fish, Reptiles, Mammals, Birds,	and name a variety of common animals that are carnivores, herbivores and omnivores	
Amphibians (+ examples of each)	Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and	
Herbivore, Omnivore, Carnivore,	mammals, including pets).	
Leg, Arm, Elbow, Head, Ear, Nose,	Identify, name, draw and label the basic parts of the human body and say which part of the body is associated	
Back, Wings, Beak	with each sense.	
Year 2	Notice that animals, including humans, have offspring which grow into adults	
Survival, Water, Air, Food, Adult,	Find out about and describe the basic needs of animals, including humans, for survival (water, food and air)	
Baby, Offspring, Kitten, Calf, Puppy,	Describe the importance for humans of exercise, eating the right amounts of different types of food, and	
Exercise, Hygiene	hygiene.	

	Everyday materials		
Year 1	Distinguish between an object and the material from which it is made		
Wood, Plastic, Glass, Paper, Water, Metal, Rock, Hard, Soft, Bendy, Rough, Smooth	Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock. Describe the simple physical properties of a variety of everyday materials. Compare and group together a variety of everyday materials on the basis of their simple physical properties		
Year 2 Hard, Soft, Stretchy, Stiff, Shiny, Dull, Rough, Smooth, Bendy, Waterproof, Absorbent, Opaque, Transparent Brick, Paper, Fabrics, Squashing, Bending, Twisting, Stretching Elastic, Foil	Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses. Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.		

Seasonal Changes	
Year 1 Summer, Spring, Autumn, Winter, Sun, Day, Moon, Night, Light, Dark	Observe changes across the four seasons. Observe and describe weather associated with the seasons and how day length varies

Living things and their habitats	
Year 2	Explore and compare the differences between things that are living, dead, and things that have never been
	alive.

Living, Dead, Habitat, Energy, Food chain, Predator, Prey, Woodland, Pond, Desert	Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other Identify and name a variety of plants and animals in their habitats, including micro-habitats. Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain,
	and identify and name different sources of food.

	Working at Greater Depth
Year 1	Can begin to describe what each part of a plant does.
	Can begin to classify animals according to a number of given criteria.
	Can point out differences between living and non-living things.
	Can name some parts of the human body that cannot be seen.
	Can say why certain animals have certain characteristics.
	Can name a range of wild animals?
	Can describe things that are similar and different between materials.
	Can explain what happens to certain materials when they are heated.
	Can explain what happens to certain materials when they are cooled.
Year 2	Can name some characteristics of an animal that help it to live in a particular habitat
	Can describe what animals need to survive and link this to their habitats.
	Can explain that animals reproduce in different ways.
	Can describe what plants need to survive and link it to where they are found Can they explain that plants grow and
	reproduce in different ways
	Can describe the properties of different materials using words like, transparent or opaque, flexible, etc.
	Can sort materials into groups and say why they have sorted them in that way
	Can say which materials are natural and which are manmade
	Can explain how materials are changed by heating and cooling
	Can explain how materials are changed by bending, twisting and stretching
	Can tell which materials cannot be changed back after being heated, cooled, bent, stretched or twisted

Lower KS2

Animals including humans		
Year 3	Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make	
Movement, Muscles, Bones, Skull,	their own food; they get nutrition from what they eat	
Nutrition, Skeletons,	Identify that humans and some other animals have skeletons and muscles for support, protection and	
	movement	
Year 4	Describe the simple functions of the basic parts of the digestive system in humans	
Mouth, Tongue, Teeth, Oesophagus, Stomach, Small	Identify the different types of teeth in humans and their simple functions	
Intestine, Large Intestine, Herbivore,	Construct and interpret a variety of food chains, identifying producers, predators and prey	
Carnivore, Canine, Incisor, Molar	Forces and magnets	
Year 3	Compare how things move on different surfaces	
Magnetic, Force, Contact, Attract,	Notice that some forces need contact between two objects, but magnetic forces can act at a distance	
Repel, Friction, Poles, Push, Pull	Compare and group together a variety of everyday materials on the basis of whether they are	
	attracted to a magnet, and identify some magnetic materials	
	Describe magnets as having two poles	
	Predict whether two magnets will attract or repel each other, depending on which poles are facing	
<u> </u>	Light	
Year 3 Light, Shadows, Mirror, Reflective,	Recognise that he/she needs light in order to see things and that dark is the absence of light Notice that light is reflected from surfaces	
Dark, Reflection	Recognise that light from the sun can be dangerous and that there are ways to protect eyes	
	Recognise that light from the sun can be dangerous and that there are ways to protect eyes	
	Find patterns in the way that the size of shadows change	
	Plants	
Year 3	Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers	
Air, Light, Water, Nutrients, Soil,	Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow)	
Reproduction, Transportation, Dispersal, Pollination, Flower	and how they vary from plant to plant	
	Investigate the way in which water is transported within plants	
	Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and	
	seed dispersal	
	Rocks	
Year 3	Compare and group together different kinds of rocks on the basis of their appearance and simple physical	
Fossils, Soils, Sandstone, Granite, Marble, Pumice, Crystals, Absorbent	properties Describe in simple terms how fossils are formed when things that have lived are trapped within rock	
	Recognise that soils are made from rocks and organic matter	

Living things and their habitats		
Recognise that living things can be grouped in a variety of ways		
Explore and use classification keys to help group, identify and name a variety of living things in their local and		
wider environment		
Recognise that environments can change and that this can sometimes pose dangers and have an impact on		
living things		
Electricity		
Identify common appliances that run on electricity		
Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs,		
switches and buzzers		
Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a		
complete loop with a battery		
Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a		
simple series circuit		
Recognise some common conductors and insulators, and associate metals with being good conductors		
Sound		
Identify how sounds are made, associating some of them with something vibrating		
Recognise that vibrations from sounds travel through a medium to the ear		
Find patterns between the pitch of a sound and features of the object that produced it		
Find patterns between the volume of a sound and the strength of the vibrations that produced it		
Recognise that sounds get fainter as the distance from the sound source increases		
States of matter		
Compare and group materials together, according to whether they are solids, liquids or gases		
Observe that some materials change state when they are heated or cooled, and measure or research the		
temperature at which this happens in degrees Celsius (°C)		
Identify the part played by evaporation and condensation in the water cycle and associate the rate of		
evaporation with temperature		

Working at Greater Depth	
Year 3	Can classify igneous and sedimentary rocks
	Can begin to relate the properties of rocks with their uses
	Can investigate the strengths of different magnets and find fair ways to compare them

	Can explain why lights need to be bright or dimmer according to need
	Can say what happens to the electricity when more batteries are added
	Can explain why their shadow changes when the light source is moved closer or further from the object
	Can explain how the muscular and skeletal systems work together to create movement
	Can classify living things and non-living things by a number of characteristics that they have thought of
	Can explain how people, weather and the environment can affect living things
	Can explain how certain living things depend on one another to survive
	Can classify a range of common plants according to many criteria (environment found, size, climate required, etc.)
Year 4	Can classify living things and non-living things by a number of characteristics that they have thought of
	Can explain how people, weather and the environment can affect living things
	Can explain how certain living things depend on one another to survive
	Can give reasons for how they have classified animals and plants, using their characteristics and how they are suited to
	their environment
	Can explore the work of pioneers in classification
	Can name and group a variety of living things based on feeding patterns (producer, consumer, predator, prey, herbivore,
	carnivore, omnivore).
	Can group and classify a variety of materials according to the impact of temperature on them
	Can explain what happens over time to materials such as puddles on the playground or washing hanging on a line
	Can explain why sound gets fainter or louder according to the distance
	Can explain how pitch and volume can be changed in a variety of ways
	Can work out which materials give the best insulation for sound
	Can explain how a bulb might get lighter
	Can recognise if all metals are conductors of electricity
	Can work out which metals can be used to connect across a gap in a circuit
	Can explain why cautions are necessary for working safely with electricity

Upper Key Stage 2

Animals including humans

Year 5	Describe the changes as humans develop to old age
Foetus, Embryo, Womb, Gestation, Baby, Toddler, Teenager, Elderly,	
Growth, Development, Puberty	
Year 6	Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood
Circulatory, Heart, Blood Vessels,	vessels and blood
Veins, Arteries, Oxygenated, Deoxygenated, Valve, Exercise,	Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function
Respiration	Describe the ways in which nutrients and water are transported within animals, including humans

Living things and habitats	
Year 5 Mammal, Reproduction, Insect, Amphibian, Bird, Offspring	Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird Describe the life process of reproduction in some plants and animals
Year 6 Classification, Vertebrates, Invertebrates, Micro-organisms, Amphibians, Reptiles, Mammals, Insects	Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals Give reasons for classifying plants and animals based on specific characteristics

	Earth and Space		
Year 5 Earth, Sun, Moon, Axis, Rotation, Day, Night, Phases of the Moon, star, constellation	Describe the movement of the Earth, and other planets, relative to the Sun in the solar system Describe the movement of the Moon relative to the Earth Describe the Sun, Earth and Moon as approximately spherical bodies Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky		
	Forces and magnets		
Year 5 Air resistance, Water resistance, Friction, Gravity, Newton, Gears, Pulleys	Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object Identify the effects of air resistance, water resistance and friction, that act between moving surfaces Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird Describe the life process of reproduction in some plants and animals		
Materials			

Year 5 Hardness, Solubility, Transparency, Conductivity, Magnetic, Filter, Evaporation, Dissolving, Mixing	Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets • Recognise that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution • Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating • Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic • Demonstrate that dissolving, mixing and changes of state are reversible changes • Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda
---	--

Electricity			
Year 6 Cells, Wires, Bulbs, Switches, Buzzers, Battery, Circuit, Series, Conductors, Insulators, Amps, Volts, Cell	Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches Use recognised symbols when representing a simple circuit in a diagram		
	Evolution and Inheritance		
Year 6	Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago		
Fossils, Adaptation, Evolution, Characteristics, Reproduction, Genetics	Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution		
Light			

Year 6	Recognise that light appears to travel in straight lines
	Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect
Refraction, Reflection, Light,	light into the eye
Spectrum, Rainbow, Colour,	Explain that we see things because light travels from light sources to our eyes or from light sources to objects
	and then to our eyes
	Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that
	cast them

Working at Greater Depth	
Year 5	Can create a timeline to indicate stages of growth in certain animals, such as frogs and butterflies
	Can describe the changes experienced in puberty
	Can draw a timeline to indicate stages in the growth and development of humans
	Can observe their local environment and draw conclusions about life-cycles
	Can compare the life cycles of plants and animals in their local environment with the life cycles of those around the world
	Can describe methods for separating mixtures
	Can work out which materials are most effective for keeping us warm or for keeping something cold
	Can use their knowledge of materials to suggest ways to classify (solids, liquids, gases)
	Can explore changes that are difficult to reverse, e.g. burning, rusting and reactions such as vinegar with bicarbonate of
	soda
	Can explore the work of chemists who created new material
	Can compare the time of day at different places on the earth
	Can create shadow clocks
	Can begin to understand how older civilizations used the sun to create astronomical clocks, e.g. Stonehenge
	Can explore the work of some scientists
	Can describe and explain how motion is affected by forces? (including gravitational attractions, magnetic attraction and
	friction)
	Can design very effective parachutes
	Can work out how water can cause resistance to floating objects
	Can explore how scientists, such as Galileo Galilei and Isaac Newton helped to develop the theory of gravitation
Year 6	Can explain the advantages of a parallel circuit
	Can explain how to make changes in a circuit
	Can explain the impact of changes in a circuit
	Can explain how different colours of light can be created

Can they use and explain how simple optical instruments work? (periscope, telescope, binoculars, mirror, magnifying glass, Newton's first reflecting telescope)
Can explore a range of phenomena, including rainbows, colours on soap bubbles, objects looking bent in water and coloured filters
Can research and discuss the work of famous scientists, such as Charles Darwin, Mary Anning or Alfred Wallace
Can explain how some living things adapt to survive in extreme conditions
Can explain why classification is important
Can readily group animals into reptiles, fish, amphibians, birds and mammals
Can sub divide their original groupings and explain their divisions, such as vertebrates and invertebrates
Can find out about the significance of the work of scientists such as Carl Linnaeus, a pioneer of classification
Can compare the organ systems of humans to other animals
Can make a diagram of the human body and explain how different parts work and depend on one another
Can name and locate the major organs in the human body

https://www.gov.uk/government/publications/national-curriculum-in-england-science-programmes-of-study/national-curriculum-in-england-science-programmes-of-stu
